

## Setting up your PC or MAC Environment

### 1. Installing a code editor: Microsoft Visual Studio Code

All three Nucamp Bootcamps are leveraging the free and #1 code editor from Microsoft: Visual Studio Code, available on PC, MAC and Linux systems.

#### For PC Laptops:

- Go to <https://code.visualstudio.com>,
- Download and install Microsoft Visual Studio Code onto your laptop.

#### For MAC Laptops:

- Go to <https://code.visualstudio.com/docs/setup/mac>
- Download and install Microsoft Visual Studio Code as instructed

#### Additional step for MAC Laptops:

- Once installed, launch Visual Studio Code
- Open the *Command Palette* (*Cmd+Shift+P*) and type 'shell command' to find the **Shell Command: Install 'code' command in PATH** command.

```
>shell command
Shell Command: Install 'code' command in PATH
Shell Command: Uninstall 'code' command from PATH
```

Table of contents

1. Installing a code editor: Microsoft Visual Studio Code
2. Installing Chrome or Firefox
3. Installing Nucamp on your Phone
4. Configuring the Nucamp Folders
5. Learning the MAC Terminal or PC Command Prompt
